

Jurassic Park website

1. Introduction

- My idea is to make a website for the fictional theme park in the movie “Jurassic Park”.
- Potential (fictional) visitors will be able to plan their visit, buy tickets in advance, and learn about the park and the dinosaurs.

2. Expected List of Features

- Plan Your Visit
 - Calendar & Hours
 - Park Map
 - Transport
- Things To Do
 - Park Drive
 - Cafe
 - Gift Shop
- Dinosaurs
 - (including brief info about all the dinosaurs in the park)
- Tickets
 - General Admission
 - Season Pass
 - Group Events

3. Market Survey

- First, I went to a number of theme park websites for the basis of my project. Each one is organized differently, but the same core elements are all there.
- Next, I checked out a couple of zoo websites. This is where I got the idea for a “Dinosaurs” tab.

4. References

- I will get most of the info on the park from the wiki linked below. I will mostly use the design (colors, etc) from the movie’s prop brochure, also below.
